1. Introduction

JotSpot is a personal notes-taking app where people can keep track of their notes, tasks and deadlines all in one place

- **Problem Identified :**

In today's fast-paced world, individuals often struggle to keep track of important information from meetings, lectures, and personal tasks.

- **Solution Proposed :**

The primary purpose of this note-taking app is to provide users with a convenient and organized platform to capture, store, and retrieve their notes efficiently.

2. Objectives

1. To allow the users to save notes in the form of folders.
2. To allow users to add images in their notes.
3. To allow the users to set reminders and list their important tasks.
4. To allow the users to change page color, font color, font type, font style, giving bullets, checkmarks, etc.

3. Scope

1. Can be applied in health care industry to Track patient symptoms, note down prescriptions, and manage patient history.
2. Can be useful to students, teachers, etc.
3. Can be useful in goal tracking, manage short-term and long-term goals, track fitness routines, diet plans, or personal achievements.
4. Can be useful to Wedding Planners: Organize vendor information, track event timelines, and keep a checklist of tasks.

4. Feature /Functionality

1. Themes

- Users can select from six different themes, including options like light, dark, sage, navy to personalize their app experience.

2. Change background colour

- Users can customize app's background by choosing from a range of colours they prefer.

3. Change to-do list colour

- This feature let users adjust the colour of their to-do list to enhance visual appeal and organization.

4. Feature /Functionality

4. Change font colour

- Users have the option to modify the font colour throughout the app for improved readability and personalization.

5. To-do list

- A straightforward to-do list allows user to create tasks, track their progress and mark them as completed.

6. Reminders

- Users can set reminders by specifying dates and event names, receiving notifications about the remaining time until events or deadlines.

4. Feature /Functionality

7. Add notes

- Users can create and customize notes with features like text highlighting, font style changes, bullet points and image attachments.

8. Folders

- Saving notes in the form of folders

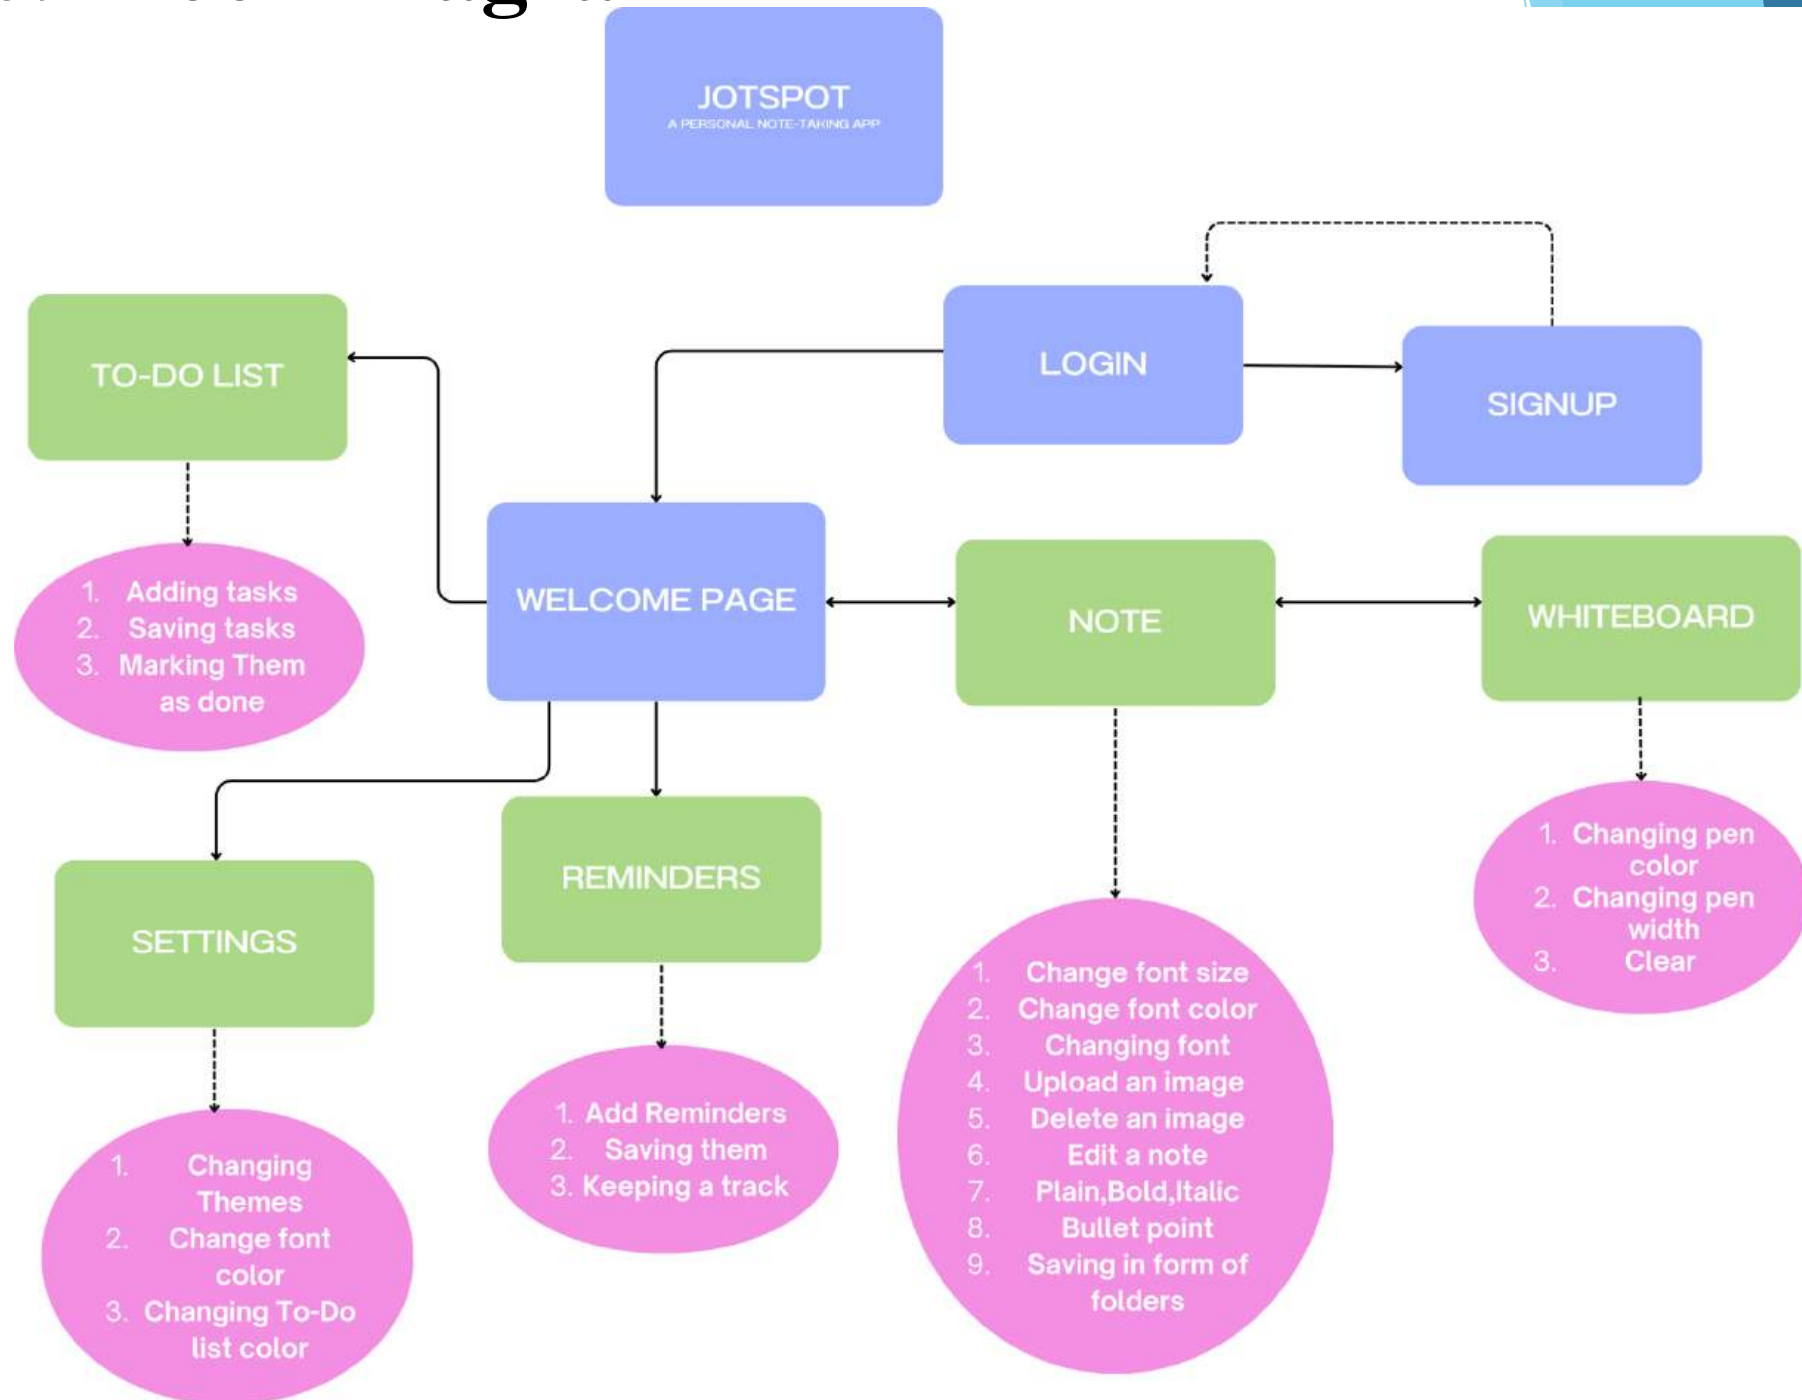

9. Whiteboard

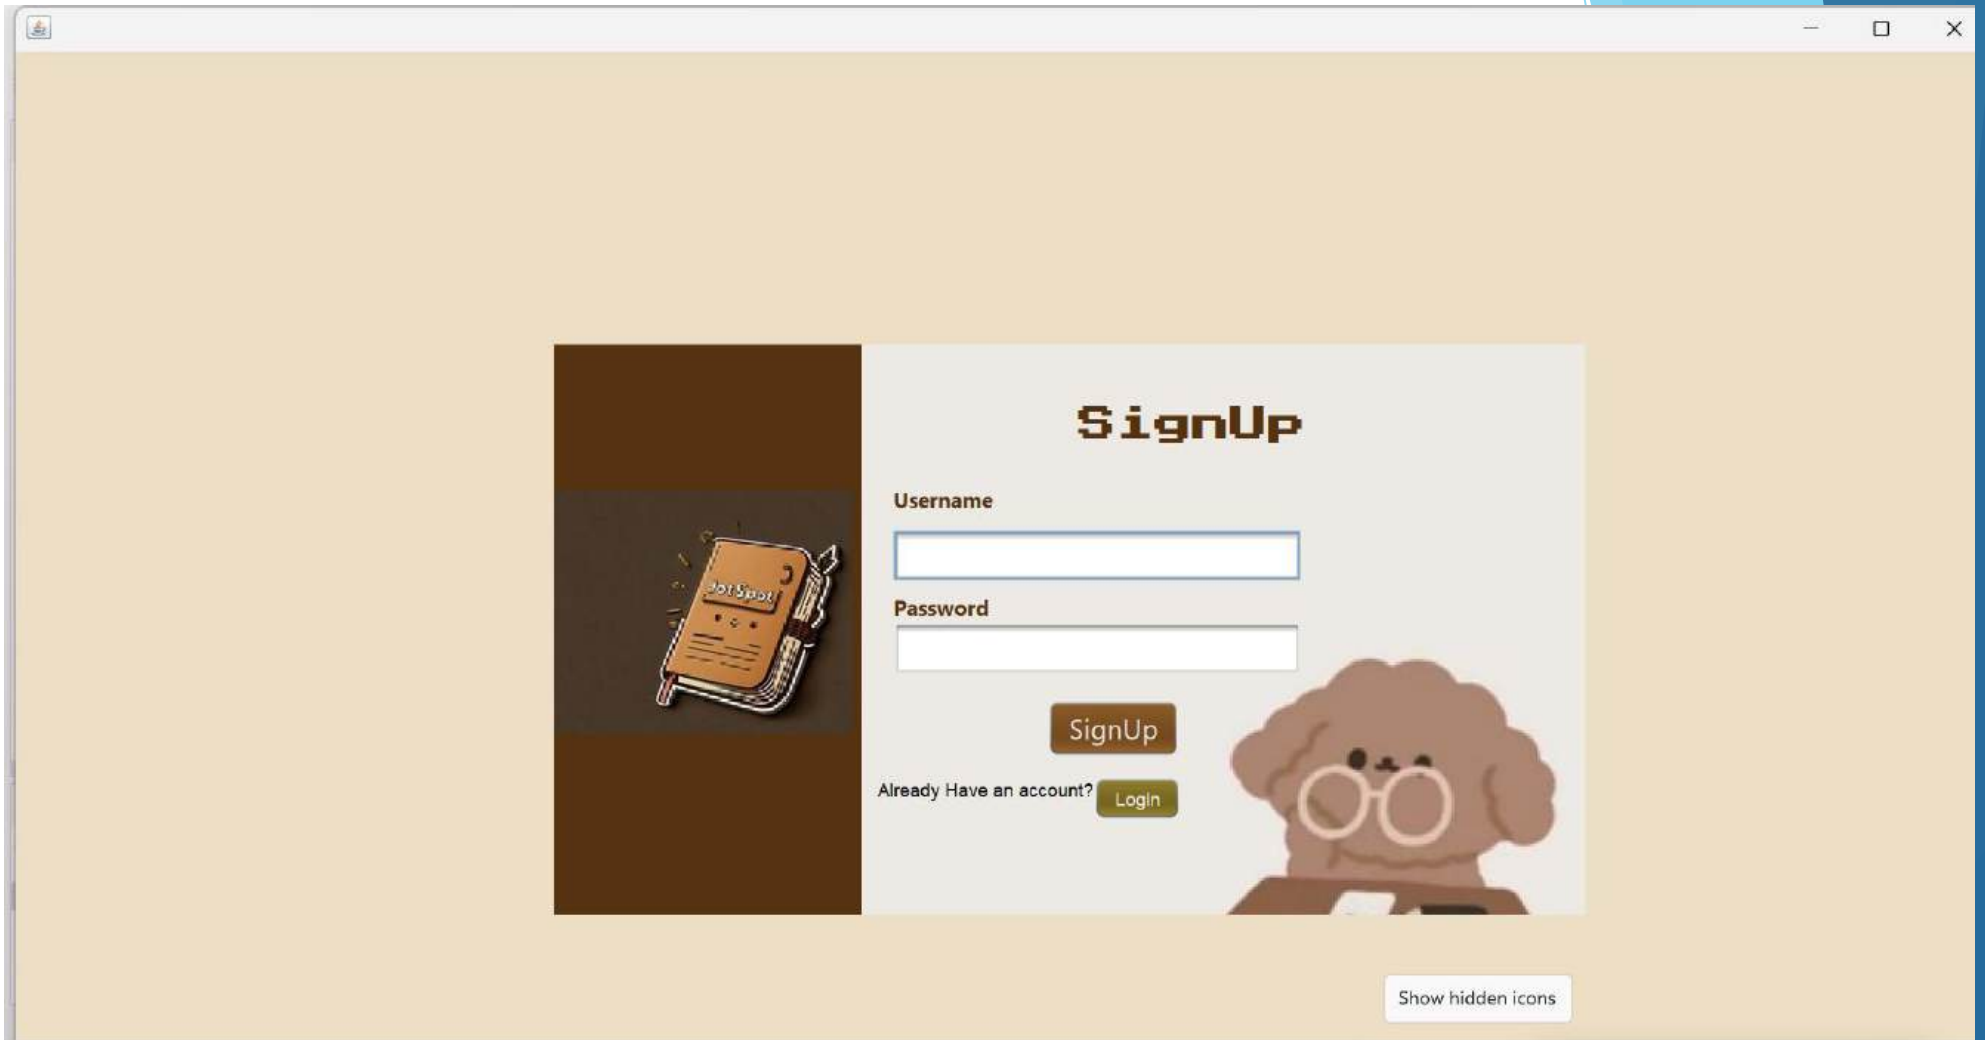

- Users can draw on the whiteboard.

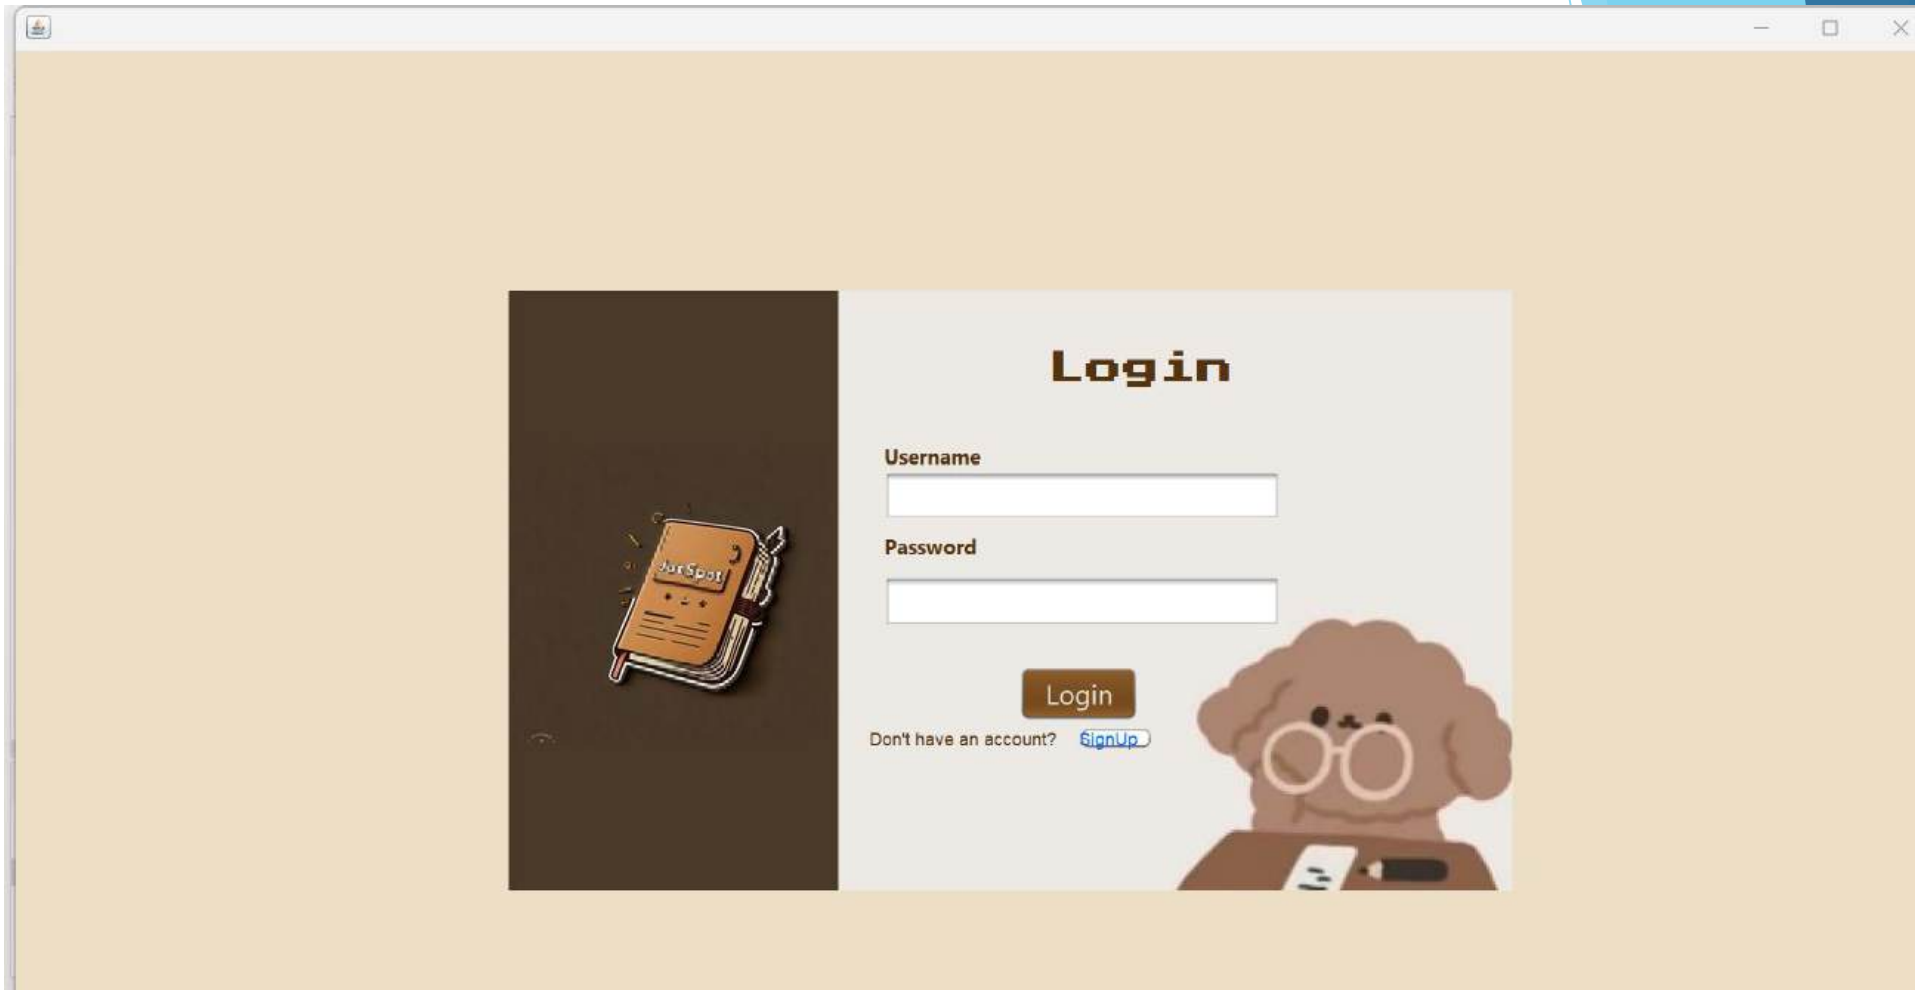

5. Outcome of Project

1. A simple and user-friendly interface where users can easily navigate and manage notes.
2. Features like a rich text editor and note categorization tools enhance the user experience.
3. Users can improve their productivity by minimizing the time spent searching for information.
